Total Investment				**$ -**	**$ 87,225**	**1629.2%**

The accompanying notes are an integral part of the unaudited financial statements.

1. Organization and Purpose

The financial statements herein consist of [redacted] (the "CIV Fund"). The entity is a co-investment fund formed under the laws of the state of Delaware to make and hold an investment alongside Mountain Capital Partners, LP (the "WI Fund"). The CIV Fund was formed on December 10, 2019, pursuant to the Amended and Restated Limited Partnership Agreement of the CIV dated December 20, 2019 (the "Agreement"). The CIV Fund commenced operations on January 3, 2020. The CIV Fund shall continue in existence as a separate legal entity until cancellation of the Certificate in accordance with the Partnership Law.

The General Partner of the CIV Fund is [redacted] GP, LLC, a Delaware limited liability company (the "General Partner").

The Manager of the CIV Fund is Mountain Capital Management, LLC, a Delaware limited liability company (the "Manager").

Capitalized terms used herein and not otherwise defined shall have the meanings ascribed thereto in the Agreement.

2. Summary of Accounting Policies

***Basis of Accounting* –** The accompanying financial statements have been prepared on the accrual basis of accounting and in accordance with accounting principles generally accepted in the United States of America ("US GAAP").

The CIV Fund is an investment company and applies specialized accounting and reporting guidance as outlined in Financial Accounting Standards Board Accounting Standards Codification ("ASC") 946, Financial Services – Investment Companies. The General Partner has evaluated this guidance and has determined the CIV Fund meets the criteria to be classified as an investment company.

***Use of Estimates* –** The preparation of financial statements in conformity with US GAAP requires the General Partner to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. Actual results could differ materially from these estimates.

Management believes that the estimates and assumptions that affect the amounts reported in the financial statements are reasonable.

***Cash* –** Cash consists of cash in banks. At any time, cash in banks may exceed federally insured limits.

***Investment Transactions* –** Purchases and sales of the investment are recorded on the date economic rights transfer. The investment is recorded at fair value with changes in unrealized appreciation and depreciation reflected in the Statement of Operations.

2. Summary of Accounting Policies (continued)

Investment Valuations **–** The CIV Fund's investment has no public market trading price and is stated at fair value as determined by the General Partner. Fair value is the estimated amount that would be received to sell its investment in an orderly transaction between willing market participants in an arm's length transaction at the measurement date.

For a security not having fixed liquidation amounts, a number of types of valuation methodologies are commonly used, including, but not limited to, "cost approach", "market approach", and "income approach". In establishing the fair value of investments for which observable market prices do not exist, the General Partner assumes a reasonable period of time for liquidation of the investments and takes into consideration the financial condition and operating results of the portfolio investment, the amounts willing buyers in orderly transactions between market participants can reasonably expect to realize upon the sale of the investments, general industry and market conditions, and any other factors deemed relevant by the General Partner.

The fair market value of an investment as of any particular date is not necessarily indicative of amounts that may ultimately be realized as a result of future sales or other dispositions of the investment held. Additionally, because of the inherent uncertainty of valuation, those estimated values may differ significantly from the values that would have been used had a public market for the investment existed, and such differences could be material.

Income Taxes **–** As a limited partnership, the CIV Fund is generally not subject to income taxes; rather, its net income and losses are passed through directly to the Partners for inclusion in their taxable income or loss. Accordingly, no provision for federal, state and local income taxes has been made in the accompanying financial statements.

The General Partner files tax returns as prescribed by the tax laws of the jurisdictions in which it operates. In the normal course of business, the CIV Fund is subject to examination by federal, state, and local jurisdictions, where applicable. The CIV Fund follows the authoritative guidance under US GAAP on accounting for and disclosure of uncertainty in tax positions, which requires the General Partner to determine whether a tax position of the CIV Fund is more likely than not to be sustained upon examination processes, based on the technical merits of the position. For tax positions meeting the more likely than not threshold, the tax amount recognized in the financial statements is reduced by the largest benefit that has a greater than fifty percent likelihood of being realized upon ultimate settlement with the relevant taxing authority.

The CIV Fund has analyzed its inventory of tax positions taken with respect to applicable income tax issues generally for the last three years of filed returns (in each respective jurisdiction), and has concluded that no provision for income tax is required in the CIV Fund financial statements. The CIV Fund recognizes interest and penalties, if any, related to unrecognized tax benefits as income tax expense in the Statement of Operations. For the nine months ended September 30, 2025, the CIV Fund did not accrue any interest or penalties. The CIV Fund is eligible and remains open for examinations of its filed tax returns for the last three years.

2. Summary of Accounting Policies (continued)

***Revenue and Expense Recognition* –** Realized gains and losses from sales of the investment are determined using specific identification and are recorded on the date economic rights transfer. Interest income is recognized on an accrual basis as earned. Discounts are accreted and premiums are amortized as adjustments to interest income and the identified cost of the investment. Dividends from the investment security are recognized as of the ex-dividend date and recorded based on the underlying characteristics of the distribution. Expenses are recognized on an accrual basis as incurred. Transaction costs related to the investment are expensed as incurred.

***Indemnifications* –** Pursuant to the Agreement, the CIV Fund has agreed to indemnify the General Partner and its affiliates against certain losses and other liabilities to which they may become subject in connection with matters arising out of or in connection with the CIV Fund's business and affairs. The CIV Fund believes that it is unlikely that it will have to make material payments under these arrangements, and no liabilities related to these indemnifications have been recognized on the accompanying Statement of Assets, Liabilities and Partners' Capital.

3. Fair Value Measurement

As described in Note 2, the CIV Fund records its investment at fair value. In accordance with ASC 820-10, Fair Value Measurement and Disclosures, the CIV Fund discloses the fair value of its investment in a hierarchy that prioritizes the transparency of inputs used in determining fair value. The transparency of the inputs is impacted by a number of factors, including the types of investment and the characteristics specific to the investment. An investment with readily available actively quoted prices or for which fair value can be measured from actively quoted prices generally will have a higher degree of transparency and a lesser degree of judgment used in measuring fair value.

Level I – Unadjusted quoted prices in active markets for identical assets or liabilities that the CIV Fund has the ability to access.

Level II – Observable inputs other than quoted prices included in Level I that are observable for the asset or liability, either directly or indirectly.

Level III – Unobservable inputs for the asset or liability, to the extent relevant observable inputs are not available, representing the CIV Fund's own assumptions about the assumptions a market participant would use in valuing the asset or liability, and would be based on the best information available.

An investment's classification within a level in the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. The General Partner's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to the investment. The categorization of an investment within the hierarchy is based upon the pricing transparency of the investment and is not necessarily indicative of the General Partner's perceived risk of that investment.

3. Fair Value Measurement (continued)

The determination of fair value using these methodologies takes into consideration a range of factors, including, but not limited to, the price at which the investment was acquired, the nature of the investment, local market conditions, current and projected operating performance, and financing transactions subsequent to the acquisition of the investment. These valuation methodologies involve a significant degree of management judgement.

As of September 30, 2025, the CIV Fund's remaining investment was solely in an approximate residual cash value of $87,225, prior to a final distribution. For the nine months ended September 30, 2025, there were no transfers in or out of Level III.

There were no purchases or issuances of assets classified in Level III of the fair value hierarchy during the nine months ended September 30, 2025.

4. Capital Contributions and Commitments

The commencement of operations of the CIV Fund occurred on January 3, 2020, with initial total commitments of $4 million. As of September 30, 2025, the Limited Partners have funded 100% of their commitments.

In order to provide funds to cover its share of CIV Expenses, each Limited Partner agrees to make additional Capital Contributions during each Fiscal Year to satisfy CIV Expenses in an aggregate amount not to exceed 1.5% per annum of its Capital Commitment, provided that all such Capital Contributions shall be in addition to each Limited Partner's Capital Commitment and shall not reduce the amount of a Limited Partner's unfunded Capital Commitment.

5. Distributions and Allocation of Profits and Losses

Distributable cash shall be distributed 100% to the Limited Partners, pro rata in proportion to their respective aggregate Capital Contributions made to the CIV Fund. As of September 30, 2025, the Limited Partners have received approximately $7.6 million cumulative distributions from the CIV Fund.

6. Related Party Transactions

The Manager makes non-interest bearing advances to the CIV Fund to pay for expenses associated with the operations of the CIV Fund and/or for the monitoring of its investment. As of September 30, 2025, such advances totaled $54,946 and are included in Due to Manager on the Statement of Assets, Liabilities and Partners' Capital.

7. Market and Other Risk Factors

The CIV Fund's investing activities expose it to various types of risk that are associated with the financial instruments and markets in which it invests. The significant types of financial risks to which the CIV Fund are exposed include, but are not limited to market, liquidity, and concentration risk. Certain aspects of those risks are addressed below:

General Economic Risk - The CIV Fund's Portfolio Investment may be impacted by changes caused by global and domestic market conditions and industry specific economic conditions. Changes in the market for public offerings could also influence the CIV Fund and its ability to realize its investment objective.

Market Risk – The CIV Fund's Portfolio Investment may be subject to, among other things, the potential for both gains and losses from price risk, interest rate risk, currency risk, and liquidity risk.

Liquidity Risk – Liquidity risk is the risk that the CIV Fund will encounter difficulty in meeting obligations associated with financial liabilities or contingent liabilities. Among other things, liquidity could be impaired by an inability to access secured and/or unsecured sources of financing or the failure of Limited Partners to meet capital calls.

Concentration Risk – The CIV Fund participates in one Portfolio Investment and solely in the energy industry. Therefore, the aggregate return of the CIV Fund may be materially and adversely affected by the unfavorable performance of the Portfolio Investment or a downturn in the overall energy industry.

Investee Risk – Certain CIV Fund investees may be smaller entrepreneurial companies which may have limited business histories, product or service lines, markets, financial resources and management depth. Such companies also may not have achieved profitable operations, or positive cash flows.

Financial instruments, which potentially subject the CIV Fund to concentration of credit risk, consist primarily of cash and the Portfolio Investment. The CIV Fund maintains its cash with one financial institution. At times, such balances may exceed the FDIC insurance limits. The CIV Fund may at times also have risk in the geographic concentration of the Portfolio Investment.

8. Financial Highlights

Financial highlights for the nine months ended September 30, 2025 are as follows:

	For the Period Ended September 30, 2025
Ratios to average Limited Partners' Capital:	
Total Expenses	(31.55%)
Net Investment Loss	(31.55%)

	From Commencement Through Applicable Date
Net Internal Rate of Return:	
September 30, 2025	18.62%
December 31, 2024	18.82%

Expenses and net investment loss amounts used to calculate the ratios above include amounts allocated to the Limited Partners' capital accounts. The average Limited Partners' capital is calculated based upon the weighted average of the ending Limited Partners' capital during the period.

The internal rate of return since commencement of operations of the Limited Partners' interest, net of all fees, was computed based on the actual dates of capital contributions and distributions, and the ending partners' capital at the end of each period (residual value) of the Limited Partners' capital as of each measurement date.

9. Investment

[redacted] ("Revolution II") – On April 17, 2024, Revolution Resources II, LLC, a subsidiary of Revolution II, closed on the sale of its Western Anadarko Basin and Cherokee assets resulting in approximately $2.0 million in proceeds distributed to the CIV Fund on May 9, 2024, and approximately $0.4 million was distributed to the CIV Fund on November 21, 2024. On April 15, 2025, the CIV Fund received approximately $0.2 million in proceeds which were subsequently distributed on May 22, 2025. Final distributions will be made in 2025.

10. Subsequent Events

Subsequent events have been evaluated up to and including November 14, 2025, the date the financial statements were available for issuance. The CIV Fund determined there are no other events that would require accrual and/or disclosure in the CIV Fund's financial statements through this date.
